

 OneAquaHealth x IEEE Hackathon

AquaVerify

Observe water. Understand your surroundings.

Help document freshwater environments through simple, guided observations.

Guided 4-Step Assessment

- 1 Location & Water Body
- 2 Water Appearance
- 3 Environmental Factors
- 4 Review & Save

What is Citizen Science?

Citizen science invites community members and students to contribute to environmental monitoring. By recording visual indicators like clarity, colour, and vegetation, you help build baseline knowledge of local

New Assessment

Step 1 of 4

Location & Water Body

Where are you observing?

Select the type of water body and enter the location.

Water Body Type

✓ Stream

River

Pond

Lake

Urban canal

Other

Location Name / Landmark

e.g., Willow Creek Bridge

Willow Creek Bridge

Riverside Urban Can

C

Observation Title

Optional — auto-generated if left blank

T

e.g., Afternoon River Check

Date & Time

Wed, Sep 30, 2026 • 12:44 PM

📍 GPS location tagging — coming in a future release.

→ Next Step

New Assessment

Step 2 of 4

Water Appearance

What does the water look like?

Observe from a safe position on the bank.

How clear does the water look?

☒ Clear

☐ Slightly cloudy

☐ Very cloudy

☐ Unsure / Cannot tell

 Why we ask this

What colour does the water appear?

☒ Normal / Natural-looking

☐ Greenish

☐ Brownish

☐ Unusual

☐ Unsure / Cannot tell

Previous

→ Next Step

New Assessment

Step 3 of 4

Environmental Factors

What is happening around the water?

Record flow, litter, vegetation, and surrounding land use.

How is the water moving?

☒ Still

☐ Light movement

☐ Fast movement

☐ Unsure / Cannot tell

💡 Why we ask this

How much visible litter or trash do you notice?

☒ None noticed

☐ Small amount

☐ Large amount

☐ Unsure / Cannot tell

💡 Why we ask this

Step 4 of 4

Field Notes & Summary

Anything else to record?

Add any extra field observations, wildlife sightings, or unusual conditions.

Additional Field Notes

Optional — your observation is valid without notes

e.g., Ducks spotted along the reeds. Riverbank was muddy after recent rain.

Photo capture and GPS tagging — coming in a future release.

Observation Disclaimer

These records represent citizen observations and are not certified laboratory measurements. They should not be used alone to determine water safety or ecosystem health.
